DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Ia. Claims 8-10, 20-21, 30 are drawn to the membrane.
- Ib. Claims 6-7, 12-13, and 29 are drawn to the valve.
- Ic. Claim 5 is drawn to the heat source.
- Id. Claims 4, 16, 19, and 28 are drawn to the film.
- Ie. Claims 3, 15, 18, and 24 are drawn to the gas.
- If. Claims 2, 14, 26 are drawn to the solder.
- Ig. Claim 23 is drawn to the stage.
- Ih. Claim 25 is drawn to the restricting device.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11, 17, 22, and 27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1725

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with David Peterson on 1-3-07 a provisional election was made without traverse to prosecute the invention of Group Ia, claims 1, 8-11, 17, 20-22, 27, and 30. Affirmation of this election must be made by applicant in replying to this Office action. Claims 2-7,12-16,18,19,23-26,28 and 29 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 8-11, 17, 20-22, 27, and 30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 18-36 of U.S. Patent No. US 6,435,396. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the instant application are encompassed by US 6,435,396.

Claims 1, 8-11, 17, 20-22, 27, and 30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-23 of U.S. Patent No. US 7,028,879. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the instant application are encompassed by US 7,028,879.
